TRENDS IN
ANALYTICAL
CHEMISTRY

REFERENCE EDITION
1993

Volume 12

CONTENTS

JANUARY, 1993

computer corner

Obtaining and processing data from laboratory instruments. I. Getting the data in the Windows environment, *by B.D.J.R. Fennema, R.J. Forster, J.G. Vos, G. Hughes and D. Diamond* 1

trends

Single-cell analysis at the level of a single human erythrocyte, *by B.L. Hogan and E.S. Yeung* 4
Micellar catalysis in reaction-rate methods, *by D. Pérez-Bendito and S. Rubzio* 9
Recent advances in the field of laser atomic spectroscopy, *by T.L. Thiem, Y.-I. Lee and J. Sneddon* 18
Molecular recognition of sugars, *by Y. Aoyama* 23
Charge-remote fragmentations for structural determination of lipids, *by J. Adams and M.J. Songer* 28

FEBRUARY, 1993

computer corner

Obtaining and processing data from laboratory instruments. II. Processing the data using EXCEL, *by B.D.J.R. Fennema, R.J. Forster, J.G. Vos, G. Hughes and D. Diamond* 37

trends

Recent advances in speciation analysis by capillary gas chromatography–microwave induced plasma atomic emission spectrometry, *by R. Lobinski and F.C. Adams* 41
Chemical pattern recognition and multivariate analysis for QSAR studies, *by Y. Miyashita, Z. Li and S. Sasaki* 50
Pyrolysis–mass spectrometry under soft ionization conditions, *by A.C. Tas and J. van der Greef* 60
In-vivo microdialysis sampling in pharmacokinetic studies, *by S. Sarre, D. Deleu, K. Van Belle, G. Ebinger and Y. Michotte* 67
A novel single beam optical spectrophotometer for fast luminescence, absorption, and reflection measurements of turbid materials, *by W. Schmidt* 74

MARCH, 1993

computer corner

An introduction to digital signal processors, *by L.E. Bowman and A.P. Wade* 83

trends

New developments in glow discharge mass spectrometry, *by Y. Mei and R.K. Marcus* 86

Interfacial analysis – techniques for the study and characterisation of advanced materials, *by R. John, A. Mirmohseni, P.R. Teasdale and G.G. Wallace* 94
Electrochemical sensors using microarray electrodes, *by T. Matsue* 100
Supercritical-fluid extraction as an alternative sample preparation method, *by M.-L. Riekkola and P. Manninen* 108
Gas chromatography–mass spectrometry in ultra trace analysis of polychlorinated dioxins and related compounds, *by A.P.J.M. de Jong and A.K.D. Liem* 115

APRIL, 1993

trends

Enantiomeric separation by micellar electrokinetic chromatography, *by K. Otsuka and S. Terabe* 125
Enantioselective gas chromatography, *by W.A. König* 130
Direct resolution in sub- and supercritical fluid chromatography on packed columns containing *trans*-1,2-diaminocyclohexane derivatives as selectors, *by F. Gasparrini, D. Misiti and C. Villani* 137
Evaluation of a new polar–organic high-performance liquid chromatographic mobile phase for cyclodextrin-bonded chiral stationary phases, *by S.C. Chang, G.L. Reid III, S. Chen, C.D. Chang and D.W. Armstrong* 144
The impact of new liquid chromatography chiral stationary phase technology on the study of stereoselective pharmacokinetics, *by I.W. Wainer* 153
Chiral drug analysis in biofluids by liquid chromatography, *I.S. Krull, F.-X. Zhou and J.-H. Yu* 159
Liquid chromatographic methods for the chiral separation of β-adrenergic blocking agents, *by C. Vandenbosch, D.L. Massart, G. Egginger and W. Lindner* 168
Chiral analysis based on polarimetric detection, *by D.M. Goodall* 177
Chiral discrimination by NMR spectroscopy, *by A.F. Casy* 185

MAY, 1993

feature

The CANAAN Conspiracy, *by R.E. Dessy* 190

computer corner

An algorithm for peak-shape analysis for differentiating unresolved peaks in chromatography, *by E. Reh* 192

trends

Capillary gel electrophoresis of biopolymers, *by A.S. Cohen, D.L. Smisek and P. Keohavong* 195
Orthogonal acceleration – a new direction for time-of-flight mass spectrometry: fast, sensitive mass analysis for continuous ion sources, *by J. Coles and M. Guilhaus* 203
Vibrational spectroscopy – where are we and where are we going?, *by J.L. Koenig* 214
On-line measurement of circular dichroism spectra during enantioselective liquid chromatography, *by A. Mannschreck* 220

JUNE/JULY, 1993

computer corner

A program for non-orthogonal rotation in factor analysis, *by L. Sarabia, M.C. Ortiz, R. Leardi and G. Drava* 226

trends

Capillary electrophoresis of inorganic ions and low-molecular-mass ionic solutes, *by P.E. Jackson and P.R. Haddad* 231

Mass spectrometric analysis of a GPI-anchored protein: the scrapie prion protein, *by M.A. Baldwin, A.L. Burlingame and S.B. Prusiner* 239

On-line dialysis as a sample-preparation technique for column liquid chromatography, *by N.C. van de Merbel and U.A.Th. Brinkman* 249

In vivo blood-gas and electrolyte sensors: progress and challenges, *by M.E. Meyerhoff* 257

Sensitive techniques for phospholipase D determination in plants, *by C. Thévenot, J. Daussant, J. Kás and O. Valentová* 266

AUGUST, 1993

computer corner

Some easy and fast ways to calculate real degree derivation, *by P. Polák* 272

trends

Voltammetry of metal ion–macromolecule interactions: application to speciation problems, *by M. Esteban, C. Ariño, J.M. Díaz-Cruz and E. Casassas* 276

Potentiometric ion sensors based on natural carboxylic polyether ionophores and their derivatives, *by K. Suzuki and K. Tohda* 287

Analyte detection in complex solid matrices with pyrolysis–atmospheric pressure chemical ionization tandem mass spectrometry, *by A.P. Snyder* 296

Trace analysis in capillary supercritical fluid chromatography: sample introduction, *by T. Greibrokk and B.E. Berg* 303

SEPTEMBER, 1993

monitor

Lags in the publication of research findings in analytical chemistry, *by T. Braun, H. Maczelka and S. Zsindely* 309

trends

What's happening at the liquid–liquid interface in solvent-extraction chemistry?, *by H. Watarai* 313

Multivariate curve resolution applied to liquid chromatography–diode array detection, *by R. Tauler and D. Barceló* 319

Applications of chemical ionization mass spectrometry for the identification of environmental contaminants and agrochemicals, *by M.J. I. Mattina* 328

Process analysis in the metallurgical industry, *by K.H. Koch* 333

From neutron activation to inductively coupled plasma–atomic emission spectrometry in the determination of rare-earth elements in rocks, *by P. Voldet* 339

OCTOBER, 1993

trends

Trace enrichment of environmental samples in capillary zone electrophoresis, *by M.W.F. Nielen* 345

Analytical applications of electrified interfaces between two immiscible solutions, *by P. Vanysek* 357

The use of gas chromatographic detectors in column liquid chromatography, *by Ch.E. Kientz and U.A.Th. Brinkman* 363
Recent developments in methods of analysis for mycotoxins in foodstuffs, *by P.M. Scott* 373
Approaches to the continuous monitoring of seawater pH and its role in the global carbon cycle, *by R.G.J. Bellerby, G.E. Millward, D.R. Turner and P.J. Worsfold* 382

NOVEMBER/DECEMBER, 1993

trends

Calorimetric sensing in bioanalytical chemistry: principles, applications and trends, *by P. Bataillard* 387
Imaging applications for chemical analysis utilizing charge coupled device array detectors, *by C.W Earle, M.E. Baker, M. Bonner Denton and R.S. Pomeroy* 395
Real-time instrumentation for monitoring water quality: an Australian perspective, *by B.T. Hart, I.D. McKelvie and R.L. Benson* 403
Mass spectrometry of proteins, *by P. Roepstorff* 413
Analysis of anthracycline antitumour drugs in tissues and body fluids using liquid chromatography, *by J. de Jong, A. Bast and W.J.F. van der Vijgh* 422
On-line solid-phase reactors for unsegmented continuous-flow drug analysis, *by J. Martínez Calatayud and J.V. García Mateo* 428
